Please tell us more about your samples...

About how many samples do you have to be analyzed?

Is there a particular date by which you require the data from these samples?

****We try our best to accommodate various deadlines, but no guarantees can be made.**

Estimated concentration of compound to be analyzed (i.e. $[\text{CH}_4]$, weight % carbon or nitrogen, etc.)

If you are unsure of the estimated concentration of the compound, please describe the samples in more detail (i.e. color (especially with sediment samples and filters), volume filtered, species name(s), possible presence of carbonate, conditions of the place from which the samples were taken, or any other information that may help us make such an estimate.)

Have your samples been prepared with any kind of hazardous substance?

Acidified Poisoned (type of poison used: _____)

Other, please specify:

If your samples are not going to be fully prepared for us, what prep work will we need to do?

Drying Grinding Weighing Acidification Filter Preparation

Amino Acid Preparation

Other, please specify:

Elemental analyses for C and N:

Do your samples contain any $^{13}\text{C}/^{15}\text{N}$ label? ^{13}C ^{15}N

How enriched do you expect your samples to be? Highly Fairly Slightly

****If only some of your samples are enriched, please keep separated from the natural abundance samples and label them as enriched.**

Is your C:N? Greater than 25 Less than 25

Are there samples of multiple species to be analyzed? Yes No

If yes, how do your sample names indicate each species?

Billing information:

Please tell us how the analyses will be paid for (i.e. purchase order, credit card, clamshells, etc.)
